

<b>KORG</b>	<b>ELECTRIBE•MX</b>	<b>Music Production Station</b>
-------------	---------------------	---------------------------------

<b>Feature</b>	<b>Benefit</b>
<b>ValveForce™</b> Dual tubes on output provide analog warmth and distortion	Many top DJ's and remix artists have been running their mixes through tube gear to get the warmth and "bite" that only real tubes deliver. The new 'Tribes are the only dance hardware or software able to deliver this in-demand sound!
<b>New MMT™ Synth Engine</b> 16 forms of DSP/PCM synthesis: Waveform    Cross Mod    Additive Dual Osc    VPM            PCM+Comb Chord        Comb            PCM+WS Unison       Formant        Audio In+Comb Ring Mod    Noise Sync         WS (Waveshaping)	The Electribe•MX has the most versatile and powerful synthesis engine available in a groove box, or a virtual analog synth, for that matter! A world of sonic possibilities lies under the hood, ready to bring fresh sounds to your music.
<b>207 Drum Samples and 72 Synth Samples</b>	A wide selection of drum samples for your beats, plus a broad selection of instrument samples to use in the MMT-based PCM algorithms.
<b>9 Drum Parts (plus accent)</b> <b>5 Synth Parts (plus accent)</b>	Plenty of parts to create full-sounding grooves and tracks. The separate Accent Parts (plus the ability to set each step to be affected by the Accent or not) make your music much more dynamic.
<b>New Multi-Mode Resonant Filter with "Drive"</b> Low-Pass        Band-Pass High-Pass       Band-Pass+	The Electribe•MX features a powerful new filter design that covers a wide range of tonalities and can simulate filter saturation with the new "Drive" parameter.
<b>New Modulation Parameters</b> Select from MIDI-syncable 5 LFO shapes to modulate Pitch, Panning...	Create more complex and expressive sounds!
<b>Three Effects Processors</b> Each offers 16 algorithms Chain two or all three together Send each Part anywhere in the chain	Your mixes will sound wonderful given this much power and flexibility. The effects choices include some really unique effects like the Talking Modulator and the soon-to-be-classic Grain Shifter.
<b>256 Pattern Locations/192 Preloaded!</b> Patterns can now be up to 8 bars long Realtime or step recording	Plenty of room to store your own creations. The pre-loaded patterns cover a wide range of music styles and really show off all the features of this kickin' box!
<b>Record 24 Motion Sequences Per Pattern</b> You can divide these up any way you want/need among the various parts	You'll always have enough Motion Sequencer memory to add the animation/motion to get your music sounding the way you want.
<b>64-Part Pattern Sets</b>	Perfect for live performance, allowing you to call up Patterns on the fly using the Step Keys.
