

# Gator Bone Usage Instructions

## **! Attention !**

The power supply provided with “The Bone” only works with pedals that are compatible with a “Center Pin Negative” (see symbol below) power source.

*\*Symbol should be located near your power input on your pedals*

## **Step By Step Instructions**

- 1) Chose desired length of Velcro (included) to adhere your pedal to the “Bone” surface
- 2) Cut the Velcro with scissors or utility knife
- 3) You may need to remove any “feet” from the bottom of your pedal that could interfere with the Velcro attaching to the surface of “The Bone” evenly and securely
- 4) Plug the “Daisy Chain” style power plugs into your pedals
- 5) Plug-in, Rock-out!

**The Power Supply provided is  
a 9v 1700mA power supply**

**Stamp  
The Bone**

*\*Depending on the size of your pedals, the supplied carry bag will  
in most cases hold board with pedals mounted*
