

# RETROVIBE

Step on the 60s and  
define tomorrow!

JAMPEDALS.COM

## RetroVibe

Comprised of 4 photocells, a bulb, original NOS 2SC828 transistors and carbon comp resistors, the RetroVibe mk.2 delivers the majestic sounds of the best Uni-Vibe pedals from back in the day, but housed in a modern pedalboard-friendly enclosure and featuring standard 9V DC operation, internally lifted to 15V DC.

Choose between the Vibrato and Chorus settings and navigate from slow-rate wavy sounds all the way to fast Leslie-speaker effects!

Use it in conjunction with our EXP4 Expression pedal for real-time Speed control!

An added twist! We have incorporated an internal trimmer that affects the maximum intensity of the effect, but also dramatically manipulates the sound of the RetroVibe mk.2, all the while, maintaining the pedal's true vintage character.

Roses are red violets are blue  
the RetroVibe's purple and  
you'll looove it too!

### CONTROLS

1. **DEPTH** sets the effect amount in the dry signal
2. **SPEED** sets the rate of the modulation
3. Toggle-switch selects Chorus (C) and Vibrato (V) modes
4. Internal trimmer sets the maximum intensity of the effect, but also dramatically manipulates the sound of the RetroVibe, all the while, maintaining the pedal's true vintage character

### EXPRESSION PEDAL INPUTS

1. Expression pedal input for remote Speed control

\*Be advised that this only works with same spec expression pedals as our EXP4 which is sold separately through our e-shop.

### SPECIFICATIONS

1. True Bypass
2. Works with 9V DC adaptor (tip-negative)
3. Power consumption: 80 mA
4. Dimensions (jacks, pots etc. included): 12 x 9.5 x 3.4 cm / 4.7 x 3.7 x 1.3 inches
5. Weight: 350g / 0.77 lbs.

"I have been using a univibe Clone since the early 90's live. The RetroVibe is right on track with the perfect sound we've all heard and love. It's way more faithful and musical than other vibe pedals out there."

**J Mascis (Dinosaur Jr.)**

"I literally was looking everywhere for the right kind of vibe. As you know I'm a tone freak and we're always searching for the best...I just knew immediately that that's the sound that I was looking for...whenever I need that tone, RetroVibe is by far my favourite one!"

**Andy Timmons**

"I love the RetroVibe! It is a magic piece of equipment! It is almost on every single guitar track on the new record. I hardly turn it off these days!"

**Ruban Nielson  
(Unknown Mortal Orchestra)**

"The Retrovibe is my Vibe of choice. It has all of the "Vibe" of the original, particularly that illusive, complex midrange that responds so beautifully to pick attack. It behaves perfectly with Fuzz Face type pedals and is more transparent than any of the old Univibes I have heard. That it is so compact is quite a bonus and mine has Laurel and Hardy on it (I got lucky - the rest of you get flowers, Ha!)"

**Julien Kasper**
