

Superior Fidelity Tone Machines

Congratulations on your purchase of the FALLOUT CLOUD fuzz pedal! The use of this pedal will now allow you to achieve the best Muff style fuzz tones you've ever heard.

OVERVIEW: The Fallout Cloud is fuzz built to provide a classic triangle era fuzz tone but engineered to remove the inherent compromises of that design. From the outset the Fallout Cloud was designed to beat a particularly sweet vintage triangle muff. This was achieved with thorough analysis of the vintage pedal and some lateral thinking about the tonality of that pedal. The Fallout Cloud is the best Muff style fuzz you'll ever hear.

VOLUME: Use this control to balance the output of the pedal. Unity (where the volume out matches the volume in) is roughly at the 12 o'clock position, depending on your guitars pickup output.

SUSTAIN: This control allows you to adjust the pedals character from smooth lower gain fuzz through to a more saturated and aggressive fuzz.

TREBLE: This control adds or cuts Treble to the Fuzz. Fully counter clockwise removes treble and fully clockwise boosts treble. This control is very interactive with the bass control.

BASS: This control adds or cuts Bass to the Fuzz. Fully counter clockwise removes Bass and fully clockwise boosts Bass. This control is very interactive with the Treble control. Adjusting the Bass and Treble control allows you to tailor the tonality of the fuzz to match your guitar and amp.

POWER: The Fallout Cloud is designed to work at voltages of 9V DC. This can be from a 9V battery or a quality centre negative power supply such as the Gigrig Generator or Voodoo Lab Pedalpower Plus 2. Do not attempt to use this pedal with other voltages or polarities.

COMPONENTS: To ensure consistency, reliability and tonal supremacy the Fallout Cloud is made with extremely high quality components. 1% metalfilm resistors, WIMA and Panasonic capacitors where possible and robust through hole plated PCB'S. In short, all of this means you won't have to worry about your pedal and it should give you many years of inspiring tonal bliss.

WARRANTY: The Fallout Cloud is guaranteed for 2 years against manufacturing faults or defects. This guarantee is applicable to the original owner and is not transferable.

LEGAL: In the unlikely event of a failure ThorpyFx Ltd will not be held responsible or compensate for any loss of earnings or any other losses incurred by failure of this equipment. The use of this equipment is at the owners' own risk.
