INTRODUCTION

Thank you for your purchase of the PM50s Stereo Personal Monitor Amplifier. This unit is a unique device for monitoring ones self and program material at the same time. It has a monitor level control and a mic level control, a mic pass-through XLR jack, two headphone output jacks, and a stereo 1/4" monitor input jack.

The PM50 is designed for performers who need to monitor their own signal, such as their vocals, with the main mix. It has become very popular with drummers who need to mix a click track with a monitor signal. Church choir singers love the PM50 to monitor their voices over the musicians. And many sound technicians use the PM50 as a quick line tester to troubleshoot audio systems.

DESCRIPTION

MIC OUTPUT: XLR jack paralleled (hard-wired) to the MIC INPUT jack for pass-through to a mixer or other input device.
