

CANVAS STEREO

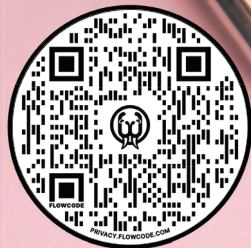

DUAL LINE ISOLATOR & D.I.

You are the artist. Your sound is the paint, and this is your canvas. After years of creating tone-painting devices, Walrus Audio is releasing The Canvas Stereo Direct Box/Line Isolator. The Canvas is designed to remove any resistance between you and your audience by giving a pristine, sonic foundation upon which to build your dual-channel masterpiece. From houses of worship to the dive bar downtown, Canvas Stereo is built to be the performance palette that goes wherever you are making your music.

LI (Line Isolator) - Use LI mode (button pressed in) when connecting your unbalanced, low impedance source (Amp + Cab Sim like the ACS1, keys, etc.). The signal will remain full volume and be converted to a balanced signal via the transformer connected to the XLR output. Less preamp gain will be required in LI mode.
