

Ellipse™ Matrix Blend

FISHMAN®

Now you can add the power and sonic clarity of Fishman's renowned blending technology to your guitar, without any visible modification. The Ellipse Matrix Blend combines the world's best-selling undersaddle pickup, the Fishman Acoustic Matrix, with the popular, new Ellipse Blend to give you incredible tone at your fingertips.

With its flexible gooseneck condenser microphone and volume, blend, and phase controls, the Ellipse Matrix Blend makes it possible to have the best of both worlds when you play: the sparkling, transparent sound and control that our Acoustic Matrix pickup affords, complemented by the unique and expressive character that a microphone provides.

And the Ellipse Blend gives your sound that extra depth without the need for major modification to your instrument. In fact, the Ellipse Blend is designed so that it's nearly invisible once installed, so it's you and your guitar that take center stage.

Product Features

- Acoustic Matrix pickup available in Narrow 3/32" (2.3mm) and Wide 1/8" (3.2mm) formats
- Custom-designed cardioid condenser mini-microphone with gooseneck mounting optimizes placement on the guitar's "sweet spot"
- Ergonomic design puts slider controls literally at your fingertips, to maintain a natural playing position
- Unique, patent-pending neodymium magnetic mounting system for easy installation
- Switchable Natural I or II voicing to accommodate all guitar body sizes and performance situations
- Accommodates most round sound holes from 3.875" (98mm) to 4.125" (105mm) in diameter
